

Acute respiratory tract infection

is a leading cause of morbidity and mortality among children younger than 5 years of age in developing countries.

But

One of the most difficult things a parent can face is giving medicine to an unwilling child.

Improving taste of a child's medicine is one way to help with this problem.

offers

Azinil

Azithromycin 200 mg/5 ml PFS

Once Daily Unique Antibiotic

**in
IMPROVED
TASTE**

which is manufactured by the advanced formula that masks Azithromycin's natural bitter taste
